○ THIN SET CYANOACRYLATE

This CA Glue is extremely thin and quick setting.. It's water like consistency allows for rapid absorption into porous materials. This adhesive will also form a protective coating. It is perfect for tack gluing and all kinds final bonding projects

○ MEDIUM SET CYANOACRYLATE

This CA is Medium Viscosity. It can be considered "Multi-Purpose". It is very strong and does have some Gap Filling capability. It is recommended for wood, metals, ceramics, some plastics, and some fabrics.

● THICK SET CYANOACRYLATE

This is our Thickest Viscosity CA. This glue provides maximum Gap Filling application. It allows for extra strength on high stress areas. It will also give a few extra seconds for repositioning
